

FIRE PREVENTION WEEK

Oct. 5 – 11

Charge, use and dispose of batteries safely!

Rechargeable, lithium-ion batteries power many devices found in your home.

- Only purchase and use battery types with recognized Canadian certification marks such as UL, ETL, or CSA.
- Follow the manufacturer's instructions and only use the charging cord that came with the device or a compatible replacement from the same manufacturer.
- Do not put lithium-ion batteries or any batteries in your garbage cart or curbside recycling container.

Visit coquitlam.ca/SeasonalSafety for disposal information and more safety tips.
